21:42 @key_2 This is the body of a single line post sent in ethercom. Font is Maven pro, text size 16 pt, and module height is 48 px.

@user

22:15 @key_3 This shows interaction when linking channels, for example, typing #channel_7 would push this post to #channel_7. Similarly, a url links in the same way: https://demo.www.blackbook.systems. Clicking on a link will open the channel, file, or key in a new window.

21:42 @key_4 This is the body of a single line post sent in ethercom. Font is Maven pro, text size 16 pt, and module height is 48 px.

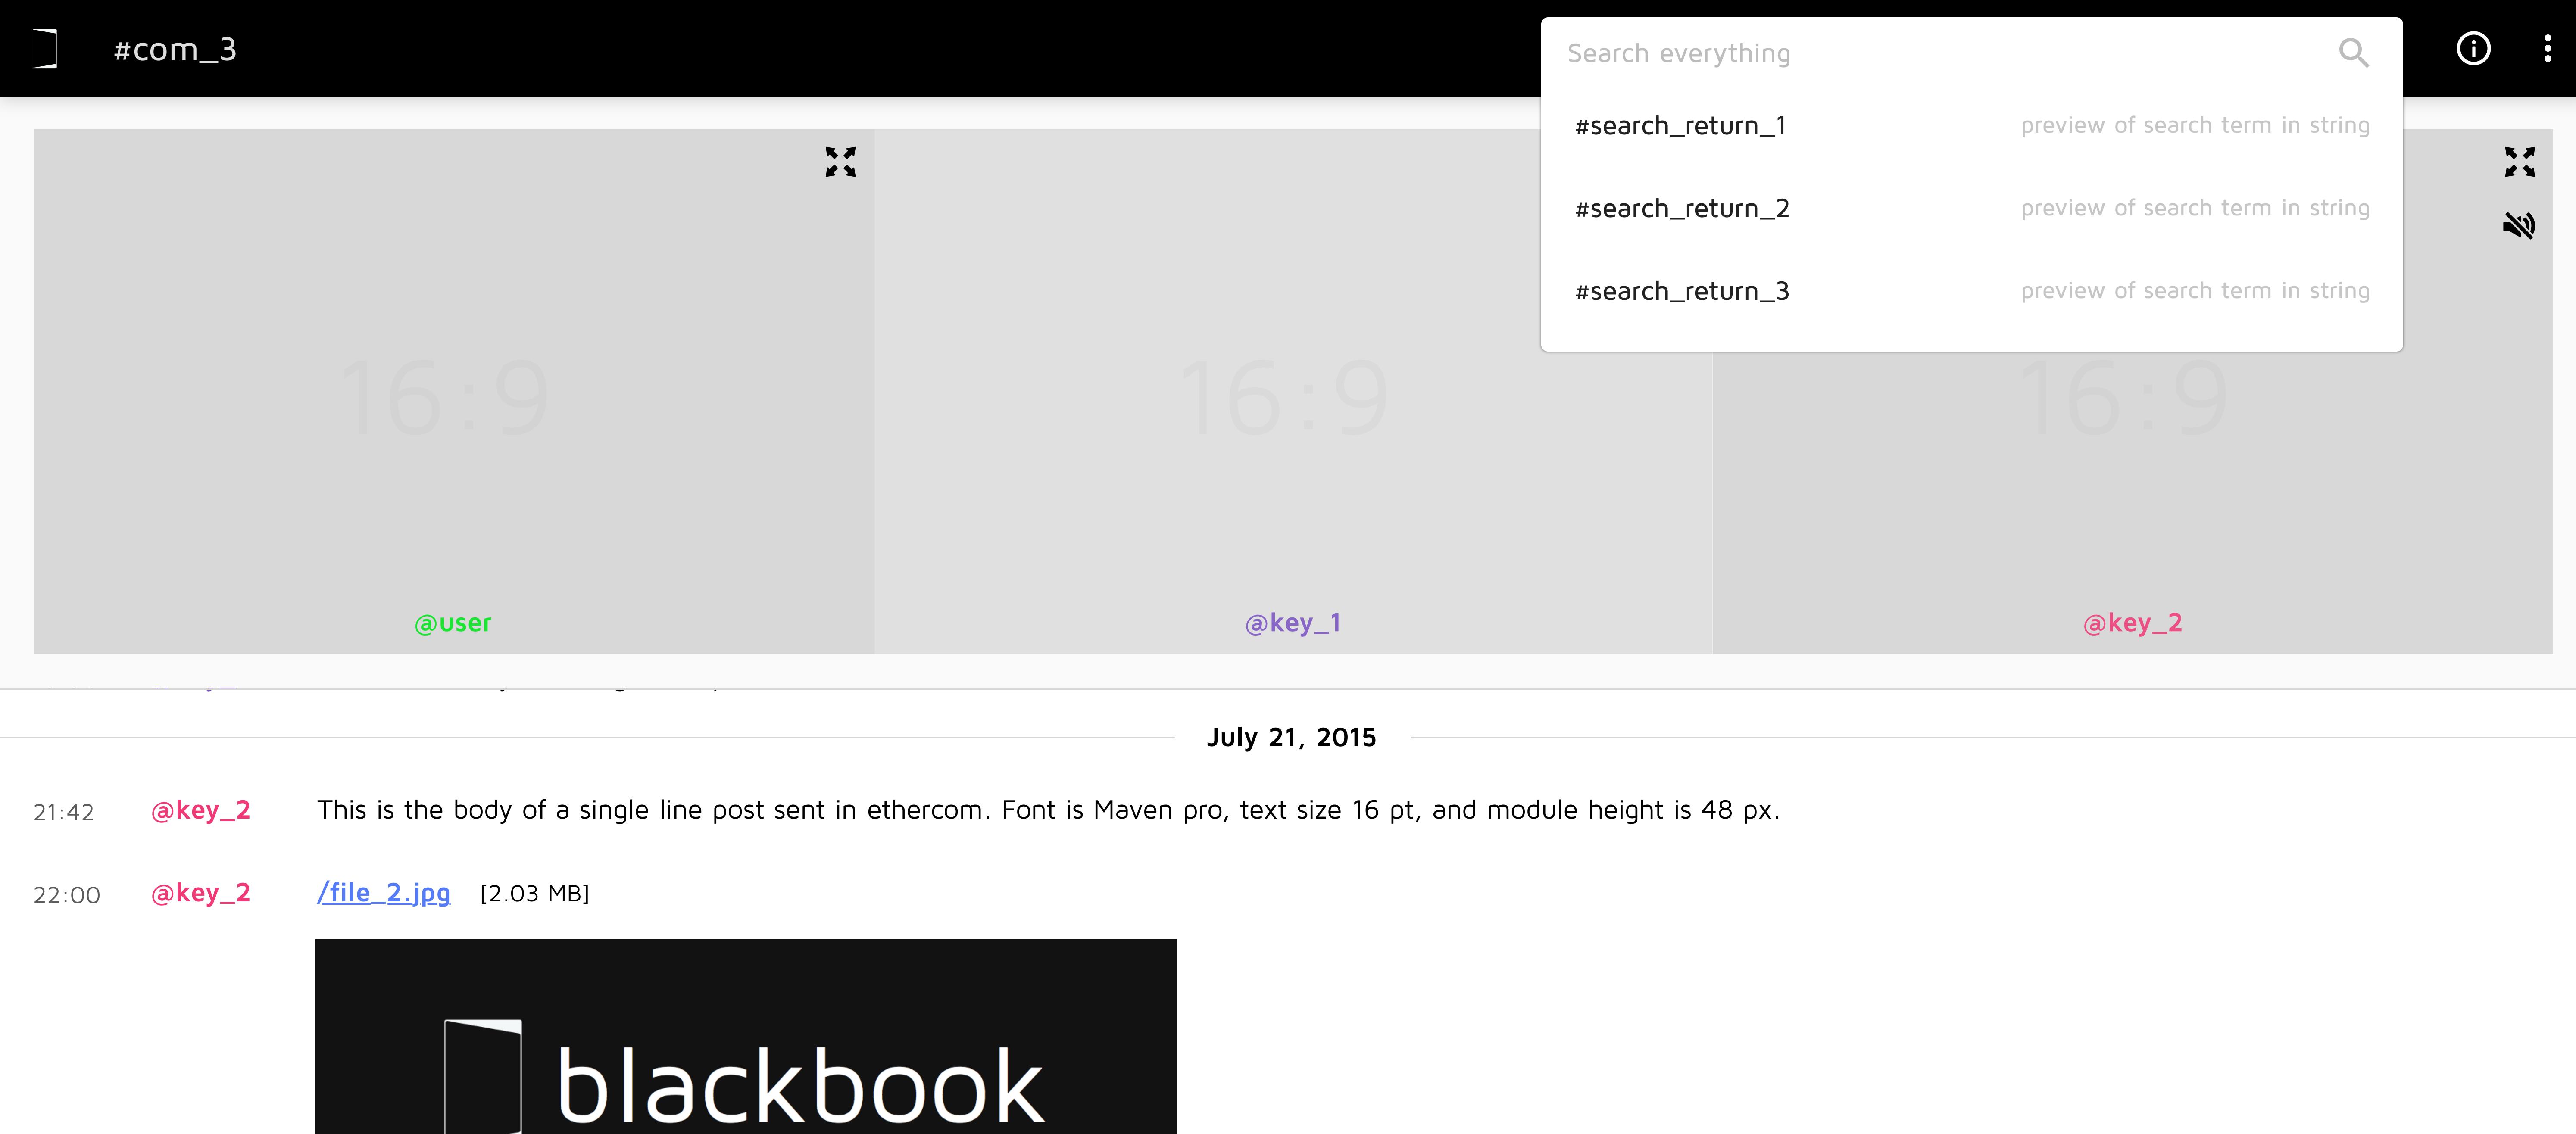

22:00 @key_4 This is the body of a multi line post sent in ethercom. Text size 16 pt, line height is 19 pt. Within each post, text has a top margin of 13 px and a bottom margin of 16 px. The timestamp on the far left of each post is 14 pt, with a 15 px top margin, a 19 px left gutter, and a 32 px trailing default margin. Key handles have a trailing default margin of at least 19 px.

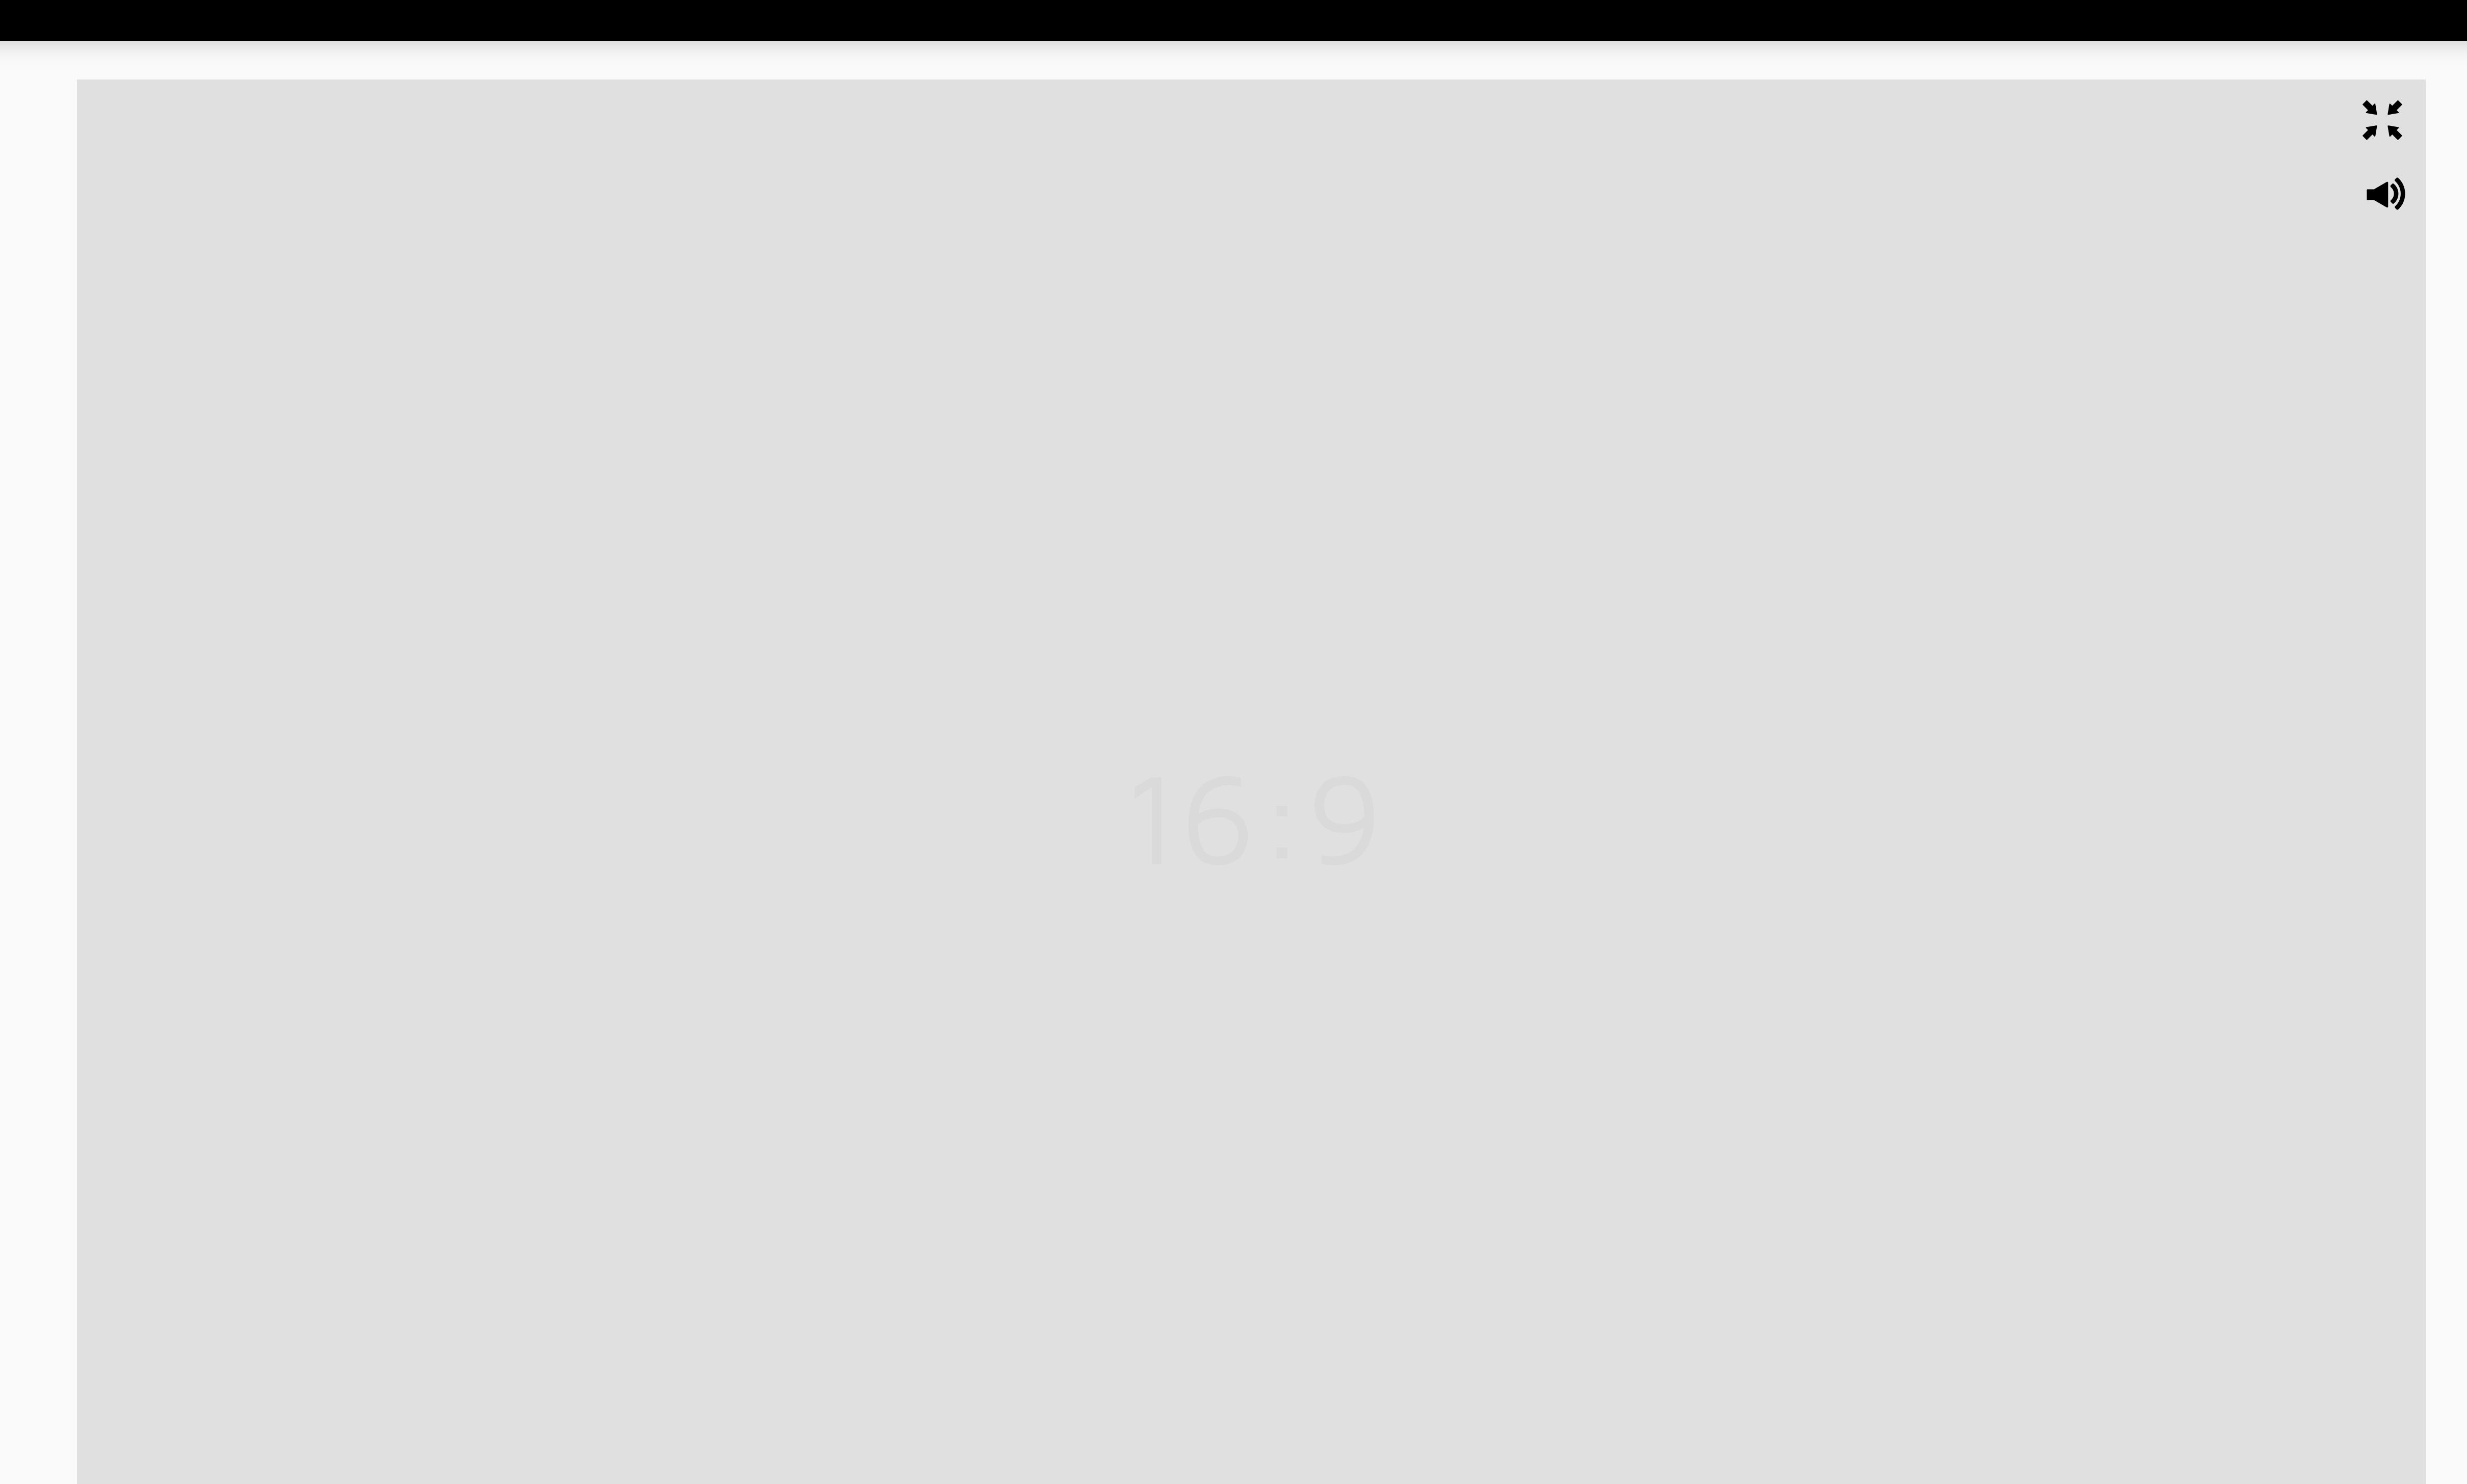

This shows interaction when linking channels, for example, typing <u>#channel_7</u> would push this post to <u>#channel_7</u>. Similarly, a url links in the same way: @key_3 22:15 https://demo.www.blackbook.systems. Clicking on a link will open the channel, file, or key in a new window.
